DETAILED ACTION

Allowable Subject Matter

Claims 11-22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or teach controlling a second actuator on the basis of acceleration of a movable element as recited in claim 11. Novak et al. mentions acceleration in column 10 lines 55-58 and states that the counter force from acceleration of the movable element 22b is not transferred to the beam 20 (the stator of the first actuator). Thus Novak et al. does not control the second actuator on the basis of acceleration. The prior art of record does not disclose or teach anything about the barycenter of the stator in combination with the other features of claim 17.
